

EXECUTIVE SUMMARY

Founder, AI Systems Architect, and Deep Tech Engineer building sovereign AI infrastructure, autonomous multi-agent swarms, and high-concurrency distributed backend systems from first principles. Founder & CEO of **Varellen Technologies** and **Norveth** (norveth.app). Track record of shipping **22+ production-grade AI platforms across 31 global hackathons** on Devpost. Computer Science & Distributed Systems background at **VIT-AP University** (2024–2028).

VENTURE LEADERSHIP & SYSTEMS ENGINEERING

Varellen Technologies — Founder & Chief Executive Officer2024 – PRESENT | ENTERPRISE & SYSTEMS

- Guiding venture roadmap and system design for enterprise digital platforms, autonomous AI workflow automation pipelines, and high-throughput cloud infrastructure.
- Architected fault-tolerant microservice meshes with sub-millisecond API dispatch, zero-trust security postures, and automated Docker/K8s CI/CD pipelines.

Norveth — Founder & Systems Architect (norveth.app)2024 – PRESENT | AI INTELLIGENCE PLATFORM

- Architected full-lifecycle website intelligence platform utilizing **real Chromium headless rendering**, **Model Context Protocol (MCP)** server integration, and automated OWASP Top 10 security/performance diagnostics.
- Engineered distributed scan workers, deterministic AI code remediation pipelines, and developer CLI tools for code-level diagnostics.

Independent Systems Engineering & Strategic Advisory — Principal Technical Consultant2024 – PRESENT | GLOBAL REMOTE

- Delivering high-concurrency backend APIs, custom multi-agent orchestration frameworks, and mission-critical database designs for international founders.
- Conducted empirical research in agent convergence, vector embedding spaces, and proactive cyber attack surface mapping (OSPRED framework).

FLAGSHIP ARCHITECTURES & SHIPPED SYSTEMS (22+ PROJECTS)

The Vector / Vector AI Command CenterAutonomous C-SuiteMulti-Agent Swarms, Python, LangChain, FastAPI, Next.js

- Autonomous multi-agent executive council (CEO, CTO, CMO) that transforms startup concepts into complete business plans, distributed tech architectures, and financial models with cross-agent consensus in seconds.

CompanyBrain\_AI & Qwen Chaos MemoryAgentEnterprise & Neural AIPython, Vector Search, FastAPI, Qwen LLM, PostgreSQL

- Autonomous enterprise AI executive fusing contracts, financials, and roadmaps alongside a self-persistent MemoryAgent with cross-session state recall engineered for the Qwen Global Hackathon.

ResQNet Disaster Response Grid & LaunchLensCrisis AI & Due DiligenceNext.js 16, Node.js, WebSockets, Geospatial AI, Python

- Real-time crisis orchestration grid for incident severity triage and life-saving resource dispatch paired with a multi-model market validation engine for VC due diligence.

OSPRED Autonomous Security Engine & ShadowForgeSecurity & Web3Python, FastAPI, Docker, Linux Hardening, Solidity, Web3.js

- Proactive cybersecurity surface discovery, automated threat intelligence synthesis, and zero-trust Linux hardening combined with EVM on-chain intelligence auditing.

TECHNICAL ARSENAL & DOMAIN MASTERY

AUTONOMOUS AI:Multi-Agent Swarms, Model Context Protocol (MCP), LangChain, LlamaIndex, RAG Pipelines, Vector DBs (ChromaDB, Pinecone), Prompt Engineering.

LANGUAGES:Python, TypeScript, JavaScript, Go, Rust, Java, C/C++, SQL, Bash/Shell, Solidity.

BACKEND & INFRA:FastAPI, Node.js, Express, Next.js 16 (App Router), React 19, PostgreSQL, Redis Streams, MongoDB, Docker, Kubernetes, AWS, Nginx, CI/CD.

SECURITY & WEB3:OWASP Top 10 Hardening, Attack-Surface Mapping, Zero-Trust Architecture, EVM Smart Contracts, Cryptographic Protocols, Network Triage.

EDUCATION & 31 HACKATHONS TRACK RECORD

VIT-AP University — B.Tech in Computer Science & Engineering2024 – 2028 | ANDHRA PRADESH, INDIA

Core Focus: Distributed Systems, Operating Systems Internals, Advanced Algorithms, Computer Networks, Database Architecture, Machine Learning.

31 Global Hackathons (22 Projects): Google Agentic AI Hackathon, Qwen Global Hackathon, Slack AI Hackathon, Global Disaster Tech, Bank of India National Hackathon.
