SUMMARY

Founder, AI Systems Architect, and Deep Tech Engineer engineering autonomous multi-agent orchestration frameworks, MCP discovery search engines, and high-concurrency distributed backends. Founder of **Norveth** (norveth.app; web, apps, AI systems and security reviews). Builder of **40+ shipped software systems across 50+ global hackathons** (Google Cloud Rapid Agent, Bank of India & IIT Hyderabad, SanDisk, Qwen Global). Computer Science & Distributed Systems at **VIT-AP University** (2024–2028).

BRANDS & SYSTEMS ENGINEERING

Norveth — Founder & Systems Architect (norveth.app) 2024 - PRESENT | ENGINEERING INTELLIGENCE

- Architected full-lifecycle website engineering intelligence platform utilizing **Playwright dynamic headless crawling** with exponential backoff & LLM failover, **Model Context Protocol (MCP)** tooling, and automated OWASP Top 10 security/performance diagnostics.
- Engineered Engineering Knowledge Graph reasoning layer mapping findings into interactive architecture diagrams and deterministic code fixes.

Yaltan — Personal Project 2024 - PRESENT | AI CAPABILITY SEARCH

- Engineered autonomous discovery and indexing engine for Model Context Protocol (MCP) servers, reusable AI skills, and plugins using the Yaltan scraping pipeline.
- Designed Canonical Capability Schema and automated tool verification engine with SSRF/prompt-injection safety metadata scoring.

FLAGSHIP ARCHITECTURES & HACKATHON SYSTEMS (50+ HACKATHONS)

SlackMind Agent Command Center

Google Cloud Rapid Agent

Gemini, Vertex AI Data Store, MCP, Slack Bolt, Python

Autonomous AI agent orchestration kernel coordinating intelligent agent swarms directly inside Slack with Gemini models, Vertex AI Search Data Store, and MCP tool routing.

The Vector / Vector AI Command Center

Autonomous C-Suite

Multi-Agent Swarms, Python, LangChain, FastAPI, Next.js

Autonomous multi-agent executive council (CEO, CTO, CMO) that transforms startup concepts into complete business plans, distributed tech architectures, and financial models with cross-agent consensus in seconds.

Mule Account Detection System	Bank of India & IIT Hyderabad	Graph ML, Anomaly Detection, Python, FastAPI, FinTech
High-frequency financial crime and suspicious transaction detection system identifying illicit mule account networks in real-time.		
IWCIS Storage Architecture & Qwen Chaos	SanDisk & Qwen Global	exFAT Internals, Container Architecture, Qwen LLM, Vector Memory
Containerized exFAT file-system storage optimization (SanDisk) paired with a self-persistent neural MemoryAgent with cross-session state recall (Qwen Global).		

TECHNICAL ARSENAL & DOMAIN MASTERY

AUTONOMOUS AI & QUANT:	Multi-Agent Swarms, Model Context Protocol (MCP), LightGBM, Quantitative Volatility, LangChain, RAG Pipelines, Vector DBs (ChromaDB, Pinecone).
LANGUAGES:	Python, TypeScript, JavaScript, Go, Rust, Java, C/C++, SQL, Bash/Shell, Solidity.
BACKEND & INFRA:	FastAPI, Node.js, Express, Next.js 16 (App Router), React 19, PostgreSQL, Redis Streams, Docker, Kubernetes, Playwright, Cloudflare Tunnels.
SECURITY & WEB3:	OWASP Top 10 Hardening, SSRF Protection, Zero-Trust Architecture, Cryptographic Protocols, Graph Anomaly Detection.

EDUCATION & 50+ HACKATHONS TRACK RECORD

VIT-AP University — B.Tech in Computer Science & Engineering	2024 - 2028 ANDHRA PRADESH, INDIA
Core Focus: Distributed Systems, Operating Systems Internals, Advanced Algorithms, Computer Networks, Database Architecture, Machine Learning.	
50+ Global Hackathons & Challenges: Google Cloud Rapid Agent, Bank of India & IIT Hyderabad, SanDisk Storage, Qwen Global, Slack AI, Google Devpost/XPRIZE.
